

Design & Implementation of a Student Project Submission and Tracking System

DEPARTMENT OF SOFTWARE ENGINEERING
LANDMARK HIGHER INSTITUTE, BUEA
ACADEMIC YEAR: 2025/2026

Presentation Outline

- ▶ Introduction
- ▶ Problem Statement
- ▶ Aim and Objectives
- ▶ Research Questions
- ▶ Significance of the study
- Methodology
- Tools & Technologies
- Proposed system
Features
- Conclusion

Introduction

- ▶ Growth of ICT has transformed academic administration
- ▶ Traditional manual project submission is inefficient
- ▶ Challenges include lost files, delayed feedback, and poor tracking
- ▶ Need for a structured digital project submission system

Problem Statement

- ▶ Lack of centralized project submission system
- ▶ Use of informal methods (physical, messaging apps)
- ▶ Difficulty tracking versions and deadlines
- ▶ Poor transparency between students and supervisors

Aim and Objectives

AIM

Design and implement a digital project submission and tracking system

OBJECTIVES

- ▶ Enable online project submission
- ▶ Support version tracking and structured feedback
- ▶ Enforce submission deadlines

Research Questions

- ▶ What challenges exist in current project submission methods?
- ▶ How can version tracking be supported digitally?
- ▶ How can supervisors provide timely feedback?
- ▶ How can deadline enforcement improve supervision?

Significance of the Study

- ▶ Improves efficiency and transparency in project supervision
- ▶ Supports students with timely feedback
- ▶ Helps supervisors manage multiple projects

Methodology

- ▶ Agile methodology
- ▶ Primary data collected via Google Forms
- ▶ System designed using standard software engineering practices

Tools & Technologies

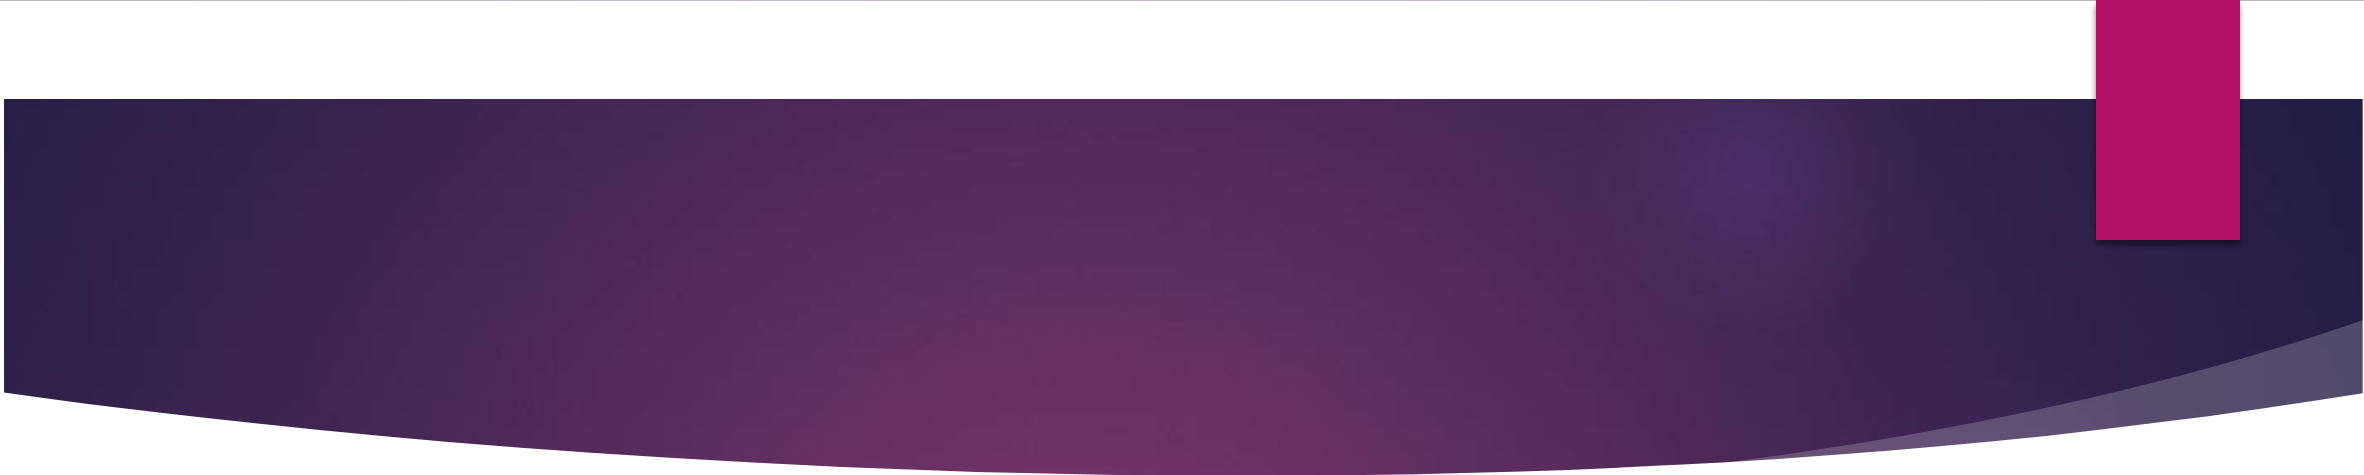

- ▶ Frontend: HTML, CSS, JavaScript
- ▶ Backend: Firebase, Firestore
- ▶ Authentication: Firebase Authentication
- ▶ Development Tool: Visual Studio Code

Proposed System Features

- ▶ Online project submission
- ▶ Structured supervisor feedback
- ▶ Project version tracking
- ▶ Automated deadline enforcement

Conclusion

- ▶ System addresses challenges of manual submission
- ▶ Improves supervision and communication
- ▶ Ensures transparency and accountability
- ▶ Provides a scalable solution for higher institutions

THANK YOU!
